# Invitation from the General Chairman

## W e l c o m e

Electrifying and dynamic speakers. Energetic hands-on workshops. Inspiring and exhilarating learning. Couple all that with breath-taking waterfront views, amazingly warm, sunny weather, and endless restaurants, entertainment and beauty. Let the Annual 2014 Symposium in San Diego begin!!!!

This year, the theme and title of our meeting is "Total Sports Team Dentistry: Marketing...Relationships...Performance." I am honored to be your Symposium Chairman and even more thrilled with the, as the famous Harry Caray put it, "It might be...it could be...it is...a HOME RUN" meeting that ASD has planned for you.

For starters, we are going to "tip off" the meeting on Thursday, June 19, with an exciting Team Dentist course. This is a great opportunity to obtain the knowledge you need to become a team dentist. Following that, Dr. Brett Dorney will be "bumping and running" attendees with a mouthguard fabrication workshop and lecture. Come and experience the new information and importance of an excellent and properly fitted mouthguard. Thursday evening we will be "splitting the uprights" with a Welcome Reception at the USOC Training Center in Chula Vista. A tour of the facility will be interesting as well as fun.

"Huddling" with the San Diego Chargers Team Physician Jerry Hizon is planned for Friday with an electrifying lecture titled "Latest Trends in Sports Medicine and How to Assemble an Elite Sports Medicine Team from High School to Pro Sports." Come learn from this seasoned team doctor how you can make a difference in the lives of athletes by assembling a sports medicine team.

Next "on deck" for Friday, you will be fired up with a "knock-out" lecture on how to be an "Unstoppable Profit Producer" for your sports dental practice by the enthusiastic and ultra knowledgeable Mike Stromsoe. Mike has wowed crowds by his fun approach and extremely successful strategies. You will not want to miss this.

"Rounding the bases" after that will be a profound lecture on the new advances in football helmet protection by Mike Short from Xenith Helmet Company, as well as Doug Lambert, DDS, tackling the important subject of restoring the traumatic injured dental patient. Dr. Lambert will include a lecture on the use of fiber reinforcement accompanied by a workshop on splinting and the making of a bridge. Both of these subjects are vitally important to any and all team dentists.

Saturday will be full of "slam dunks" with an Olympic update by Corey Warner, Bill Moreau and an inspiring Olympic athlete. They all will be sharing how we can give back by participating in their organization. Tomotaka Takeda will be sharing valuable recent research regarding concussion prevention with properly fitted mouthguards, and John Comisi will be "taking it to the rack" with his lecture about the importance of maintaining a balanced oral environment. We will finish the day with a hands-on suturing workshop with Dr. Chester Griffiths. All of these speakers will add to and stimulate your knowledge regarding sports dentistry.

Peppered in between this brilliantly exciting meeting will be a recognition luncheon, annual business meeting, and the President's Reception. Last, but certainly not least, our Annual Symposium will be "hitting the hole" with our tremendous exhibitors, our always enticing silent and live auctions, surprise guests and friendly fellowship.

As of this writing, a new development is in the works. As the MLB schedule was recently released, a Padres/Dodgers baseball game at the spectacular Petco Park is being organized for Saturday evening. As details are firmed up, a notice will go out to all attendees.

As the time for our meeting nears, I am so looking forward to us all being refreshed in knowledge and relaxed in spirit, and for us to leave with this thought from the late Jerry Coleman, San Diego Padres long-time announcer: "Oh Doctor!! You can hang a star on that one." Looking forward to seeing you all in beautiful San Diego.

Andrew Arriola, DDS  
2014 ASD Annual Meeting Chair

## General Information

### Continuing Education Credit

The Academy for Sports Dentistry is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. **Academy for Sports Dentistry designates this activity for up to 24.5 continuing education credits for full participation in the Team Dentist Course (lectures), Symposium (lectures) and (hands-on) Workshops.**

The Academy of General Dentistry also designates the Academy for Sports Dentistry as a nationally approved sponsor. The formal continuing education programs of this program provider are accepted by AGD for Fellowship/Mastership credit. The current term of acceptance extends from 7/1/2010 through 6/30/2014 – Provider ID# 211120.

The Academy also has approval as a continuing education provider for certified athletic trainers by the N.A.T.A. Board of Certification (NATABOC). Attendance at the ASD meeting counts for double credit hours towards ASD Fellowship. **Academy for Sports Dentistry designates this activity for up to 24.5 continuing education credits for full participation in the Team Dentist Course (lectures), Symposium (lectures) and (hands-on) Workshops.**

### Dress

The weather in early June is typically warm and sunny. Expect temperatures to range from 61-71 degrees. We recommend checking a 5-day forecast when packing your bags. <http://www.sandiego.org/plan-your-trip/visitor-information/weather.aspx>. The recommended attire for the Symposium is business casual.

### San Diego, California

Bordered by the Pacific Ocean to the west, the Anza-Borrego Desert and the Laguna Mountains to the east, and Mexico to the south, the diverse neighborhoods of San Diego are spread out over 4,200 square miles, offering endless opportunities for exploration and activities. Spend a day relaxing in one of the many beach communities, then hiking in the east San Diego County mountains the next. Explore the urban neighborhoods of San Diego's downtown, from the iconic Gaslamp Quarter to the eclectic community of Hillcrest. Visit the quaint and charming island town of Coronado or the picturesque village of La Jolla. San Diego's regions are so unique and diverse; there are plenty of options to discover something new each time you visit.

The beating heart of San Diego's downtown rests in the Gaslamp Quarter, comprised of 16½ square blocks in the city's central core. With a colorful array of restaurants, nightclubs, art galleries and boutiques, you will find plenty of things to do on foot. During the day, the Gaslamp Quarter is a great place for families. Visit the New Children's Museum or explore the historic Victorian architecture preserved throughout the neighborhood. Shop at Horton Plaza or catch the Trolley to Balboa Park and the world-famous San Diego Zoo or Old Town. As night falls, the Quarter transforms into a veritable adult playground as the sophisticated nightclub scene comes to life. From award-winning restaurants to happening dance clubs, jazz and rooftop bars, you'll find it in the Gaslamp Quarter.

### Hotel Accommodations

The Westin San Diego is a AAA Four Diamond Hotel centrally located in the heart of downtown and in the center of the city's major attractions. The Convention Center, Seaport Village, Little Italy, historic Gaslamp Quarter, SeaWorld, San Diego Zoo, and a variety of shopping and dining options surround the hotel and are easily accessible. The hotel is a quick walk to the San Diego Trolley and Amtrak station, and a short drive from the San Diego International Airport and all major freeways. Enjoy the Westin San Diego's panoramic views of the San Diego Bay, Coronado Island and the downtown cityscape. The sophisticated urban setting begins with the 100-foot high lobby atrium, creating a magnificent sense of arrival.

### Special Accommodations

In compliance with the Americans with Disabilities Act of 1990, the Academy for Sports Dentistry will make all reasonable efforts to accommodate persons with disabilities at its meetings. Please call (217) 227-3431 with any special requests.

### Transportation

The Westin San Diego provides a complimentary airport shuttle to and from the San Diego International Airport so guests can arrive and depart the hotel with ease. The hotel shuttle operates between the hours of 6:00 am – 11:00 pm. Once guests have retrieved their luggage from the airport's baggage claim, they can call the hotel operator at (619) 239-4500 for directions to the appropriate waiting area. When departing, guests may sign up with a luggage attendant for a scheduled time of departure. We advise that you sign up one day prior to departure in order to secure a spot. The shuttle is complimentary, but gratuities are greatly appreciated. [www.westinsandiego.com](http://www.westinsandiego.com). Taxi service is also available for a cost of approximately \$15.00 one way.

### Annual Symposium Silent Auction

Every year the Academy presents a Silent Auction to benefit education and dental trauma and prevention research. If you have autographed items or other unique items you would be willing to donate for the auction, the ASD Board welcomes your help. Please contact Shelly Lott at (217) 227-3431 or fax (217) 227-3438 with your contributions.

## “Total Sports Team Dentistry: Marketing...Relationships...Performance”

June 19-21, 2014

The Westin San Diego ~ San Diego, California

### Thursday, June 19, 2014

- 7:00 am – 8:00 am**      **Registration/Exhibits/Continental Breakfast**
- 8:00 am – 3:00 pm**      **Team Dentist Course Lectures**
- 8:00 am – 8:20 am**      **Lecture: Introduction**  
**Speaker: Stephen Mills, DDS, FASD**  
The team dentist has become an integral part of the modern high-level sports medicine team. It is imperative that any dentist who takes on the role of team dentist must be aware of how the modern sports medical team functions in addition to having the specialized dental skills and knowledge that he or she must bring to the team. This course is designed as an overview of the major areas for which the team dentist should be responsible. Dental readiness for the athlete to start and optimally compete, the ability to rapidly recognize and treat orofacial trauma, and the ability to prevent injuries with excellent mouth protection are the basic sections for any team dentist course. In addition, the course will feature two special hands-on workshops on mouthguard fabrication and intraoral suturing to enhance the didactic portion of the presentation. There will also be a section on the legal responsibilities of the team dentist at a variety of levels of competition to answer any questions that one might have about taking on the role of team dentist. The Academy for Sports Dentistry feels that any competent dentist can become a skilled team dentist, but that the position of team dentist must only be undertaken by a dentist who has the tools needed to fulfill that role completely. This course aims to provide a template for what all team dentists must be prepared for.
- 8:20 am – 9:15 am**      **Lecture: The Athletic Trainer, the Sports Medicine Team and the Dentist's Role**  
**Speaker: Gary Vitti, Certified Athletic Trainer**  
There are many members of the sports medicine team, all of whom have an important role in taking care of athletes. High-level athletes have many needs, and it is impossible for an individual to be an expert in every aspect of healthcare. This is why the sports medicine team is comprised of many allied health professionals who can deliver specialized care as needed. This presentation will discuss specifically the team dentist's role in the sports medicine team. In addition, we will discuss what both the team and athletic trainer would expect from the dentist, how to deal with high-level athletes, and other responsibilities in taking care of an athletic team. After attending this presentation, the attendee will know who the members of the sports medicine team are; what the roles, responsibilities, skills and services of the athletic trainer are; and the importance of the team dentist on the sports medicine team.
- 9:20 am – 10:45 am**      **Lecture: The Immediate Recognition and Treatment of Dental Trauma**  
**Speaker: Mark Roettger, DDS, FASD**  
Whether on the field, court or ice rink, it is important for the team dentist to recognize and manage dental trauma. With the high-paced sports we watch and love come severe injuries that require the same briskness in dealing with them. It is important for the team dentist to triage the more serious medical injuries on to our medical colleagues and provide first-line dental

treatment. This requires the team dentist to make an immediate diagnosis and to manage the patients' emergency dental concerns on site so they can be referred on to their own dentists for definitive treatment. The decisions made at the site of the trauma strongly influence the long-term outcomes for patients. Dental injuries can be classified into those requiring immediate attention (within 5 minutes), urgent attention (within 6 hours) and less urgent attention (within 12 hours). It is a race against the clock. This is especially true for tooth avulsion. Immediate replantation gives these teeth the best possible long-term prognosis. Delay in tooth replantation most certainly will lead to the eventual loss of the tooth.

Dental injuries where the tooth is displaced, such as intrusions, extrusions and lateral luxations, require urgent care by the team dentist. Your goal for these injuries involves repositioning and stabilizing the teeth in question. Splinting mobile teeth to adjacent stable teeth with a semi-rigid splint stabilizes displacement injuries. Less urgent tooth injuries such as those where teeth are not displaced (e.g. crown fractures and subluxations) do not require repositioning and stabilizing. This presentation uses the scientific evidence available to assist the team dentist in making good decisions for his/her patients. A clear diagnosis leads to proper treatment. It is dental traumatology made easy.

- 10:50 am – 11:45 am**      **Lecture: Preparation for the Team Dentist from Pre-Season Evaluation to Game-Time Readiness**  
**Speaker: Jeffery Hoy, DDS, FASD**  
For a sports team dentist, at any level, preparation and readiness is of utmost importance. We will be focusing on the key issues of pre-season exams, dealing with the athletes, and possible emergencies both on and off the playing surface. This presentation will address both the preparation and readiness for the team dentist. At the completion of Dr. Hoy's presentation, participants will be able to prepare for and conduct pre-season exams; incorporate mouthguard impressions at the time of pre-season exams; put together a game-time emergency kit; and deal with common game-related issues.
- 11:50 am – 12:30 pm**      **Lecture: Team Dentist: Drugs and Athletes**  
**Speaker: Leslie Rye, DDS, FASD, FAGD, FICD**  
This presentation will cover therapeutic agents commonly used to keep our athletes alert and free of pain and infection without violating rules of the sports-governing bodies. Knowledge of drugs to use for acute situations and the possible drug side effects help keep our athletes ready for competition. This presentation will also cover some common infections in the oral-facial area that are highly infectious and of concern for the safety of our athletes' teammates. This information should be of interest for those treating the full athletic spectrum from the young weekend participant to the highly elite competitor. The team dentist needs to work within the parameter of permitted drugs and outside the realm of PEDs (performance enhancing drugs), doping and banned/illegal drugs. The treating dentist should also have the resources to recognize these drugs. Reference information is listed to help keep the team dentist knowledgeable about banned legal or illegal drugs and substances.

**12:30 pm**

**Team Dentist Course: Pick Up Box Lunch**

**12:35 pm – 1:30 pm**      **Lecture: Immediate Recognition and Management of Bone Injuries and Categorization of These Injuries**  
**Speaker: Matthew Jacobsen, DMD, MD**  
This lecture will focus on the recognition and management of facial bony trauma. We will primarily cover the diagnosis of the simple mandible fracture and complicated mandible fracture. Recognition of other facial fractures including Le Fort I, II, III fracture, ZMC, NOE, and frontal sinus fracture will be included. We will then focus on the work-up and treatment of the simple and complicated mandibular fracture. An emphasis will be on sports-related bony trauma.

**1:35 pm – 2:30 pm**      **Lecture: Legal Considerations for the Team Dentist at Different Levels**  
**Speaker: Lee Patalowski, DMD**  
Dr. Patalowski will give an overview of emerging ethical, legal and financial issues in sports dentistry for all levels of team dentists. He will explore the different levels of competition and the unique relationship each creates. Legal characterization of this relationship determines the parties' respective legal rights and duties. In addition, common-sense risk management techniques will be discussed.

**2:35 pm – 3:00 pm**      **Lecture: Concussions and Performance Enhancement**  
**Speaker: Stephen Mills, DDS, FASD**  
It is possible that the single most important area of concern for today's athletes is that of concussions, both their recognition and proper handling. Mouthguards have a historical place in this discussion in the dental literature, but in the past several years that role has been dismissed as lacking in proper scientific background. This short presentation will discuss the past, present and future direction that the mouthguard/concussion discussion will go based on the available scientific evidence. Performance enhancement is also something that modern athletes are interested in, but we as sports dentists must be able to discuss with our teams' players what is fact and what is fiction, what is fad and what might have worth.

**3:05 pm – 5:00 pm**      **Hands-on Mouthguard Workshop**  
**Speaker: Brett Dorney, BDS, FASD**  
The mouthguard workshop will involve Dr. Brett Dorney and other members of the ASD with experience in mouthguard construction as tutors. This is a hands-on course teaching the latest mouthguard designs and techniques. The mouthguard workshop will cover mouthguard design and fabrication with a focus on pressure lamination techniques. A lecture and a video will start the workshop outlining sporting injury patterns and the mouthguard designs to reduce such injuries. Recent exciting research from Japan in impact energy reduction will be discussed. Each participant will be provided with correctly trimmed maxillary models for the workshop. After this workshop, participants will have the knowledge to construct their own mouthguards or communicate the appropriate information to their dental laboratory.

**5:30 pm**      **Welcome Reception at the USOC Training Center in Chula Vista**  
Come to this one of a kind event. The evening will consist of a tour of the facility, and a welcome reception at the training center. Transportation will be provided to and from the hotel to the Olympic Training Center.

#### Friday, June 20, 2014

**7:00 am – 7:55 am**      **Registration/Exhibits/Continental Breakfast  
Silent Auction Bidding**

**7:55 am**      **Call to Order**

**8:00 am – 9:30 am**

**Lecture: Latest Trends in Sports Medicine and How to Assemble an Elite Sports Medicine Team from High School to Pro Sports**  
**Speaker: Jerry W. Hizon, MD, San Diego Chargers Team Physician**

Dr. Hizon will discuss how treatment for athletes changes according to the level of athletic team you are associated with, be it professional, college, high school, or just the weekend athlete. He will also present insight into how he has assembled an elite sports medicine team from the high school to professional level.

**9:30 am – 10:30 am**

**Lecture: "The Unstoppable Profit Producer" – Marketing for Your Sports Dental Practice**  
**Speaker: Mike Stromsoe**

Mike has created a proven, 3-step blueprint for growing your business, creating financial security and having more freedom, all based on his distinctive philosophy developed over 28 years of research. Participants will learn real world, current entrepreneurial and marketing techniques that they will be able to implement the day they return to their business, if not before. These life-changing topics include but are not limited to:

- The Key to Drilling Down on Your Most Important Business Growth Asset
- Why People Should Do Business with YOU Over and Above Any and All Other Options
- If You Want to Reach 100% of Your Marketplace, You MUST Implement 100% of the Ways
- The Amazing Secrets Revealed by the Three MMM's

**10:30 am – 10:45 am**

**Exhibits/Breaks/Silent Auction Bids**

**10:45 am – 12:00 pm**

**Lecture: Diagnosis, Management and Treatment of Dental Traumatic Injuries**  
**Speaker: Paresh Shah, MS, DMD**

Dental trauma in sports is a common occurrence, but management can be complex, depending on the circumstances. It is important to be able to manage the situation quickly and efficiently to minimize the risk of tooth loss and optimize ideal healing. This lecture will review a variety of traumatic injuries to the teeth and jaws. We will review systematic ways to triage and manage an injury, minimize risks and optimize outcomes. We will review a variety of restorative and surgical techniques using different materials to provide participants with solutions that may be implemented easily. Participants will learn to evaluate various dental injuries and assess risks to prioritize appropriate treatment; learn practical restorative and provisional techniques to optimize restoration of injured teeth; learn practical, appropriate surgical techniques to extract traumatized teeth and preserve bone for implant treatments; learn atraumatic extraction techniques; and learn simple grafting techniques to help optimize implant placements.

**12:00 pm – 1:00 pm**

**Recognition Luncheon**

**1:00 pm – 2:00 pm**

**Lecture: "Adaptive Fit, Adaptive Hit" – New Advances in Football Helmet Protection**  
**Speaker: Mike Short, Xenith Helmet Company**

Mike will discuss changes in helmet technology and fit systems. The presentation will also address how the components of helmets work independently and together to reduce impact.

**2:00 pm – 3:30 pm**

**Lecture: "Bad Bounces and Broken Teeth" Conservative Options for Restoring the Active Athlete**  
**Speaker: Doug Lambert, DDS, FACD, FASDA, FASD, ABAD**

We are in an age of active lifestyles, with an emphasis on participating in sporting activities at both the youth and adult levels. Not surprisingly, athletic injuries to the orofacial region and the dentition are on the rise. However, restoring the injured athlete's dentition can be challenging, especially if he/she is still

planning to participate in sports. When evaluating the options for material choices and techniques, the use of direct composite resins continually rises to the top of the list, thanks to its conservative nature, flexibility to restore today's injury, and use as a transitional or long-term solution, and is likely the least costly alternative to the patient in many cases. At the conclusion of this presentation, participants will understand how the expanded use of composites can offer unique solutions to your restorative dilemmas; gain knowledge of the latest materials and bonding agents; and learn how to create full contoured crowns and fiber reinforced bridges from composite resins.

3:30 pm – 3:45 pm

**Exhibits/Breaks/Silent Auction Bids**

3:45 pm – 5:15 pm

**Lecture: Maintaining a Balanced Oral Environment**  
**Speaker: John C. Comisi, DDS, MAGD**

The infective process of dental decay has been a primary focus of the modern dental practice. However, it often becomes a "one step forward, two steps back" game. Sports drinks, frequent snacking and even some available over-the-counter oral care products can contribute to the challenges found in the oral environment. What do we as dental professionals do to help our patients cope and manage this disease process? What procedures, techniques and materials can we use to slow down the process and perhaps reverse it? This presentation will explore the latest concepts of patient care, including cariology, preventive care, diagnostics, and minimally invasive dentistry, and how bioactive materials can and should be considered for use in your dental practice. At the conclusion of this presentation, participants will understand the conditions needed in the oral cavity to help patients achieve a balanced oral environment; learn how to make patients part of the solution to their oral care, not the problem; understand the remin-demin process of the oral cavity and caries progression; evaluate preventive care considerations and diagnostics that can help aid in caries detection and treatment; and review the realm of glass ionomers and other bioactive materials and their place in today's dental care armamentarium.

6:00 pm – 9:00 pm

**President's Reception/Silent Auction & Live Auction**

**Saturday, June 21, 2014**

7:00 am – 7:55 am

**Registration/Exhibits/Continental Breakfast**

8:00 am

**Call to Order**

8:00 am – 8:30 am

**Annual Business Meeting**

8:30 am – 10:00am

**Lecture: Sports Nutrition for the Olympic Athlete to the High School Athlete**  
**Speaker: Elizabeth Broad**

This presentation will introduce the current sports nutrition recommendations for elite athletes, including fueling, recovery, hydration and supplements. The objective will be for participants to understand how to appropriately interpret these recommendations according to the level of sports participation and the type of sport undertaken, including recreational exercisers/weekend warriors, junior athletes, and elite senior athletes.

10:00 am – 10:30 am

**Exhibits/Breaks**

10:30 am – 12:00 pm

**Lecture: Update on the Sochi Olympics and the U.S. Olympic Sports Medicine Program**  
**Speaker: Bill Moreau, DC, DACBSP, CSCS**

There were a number of challenges and celebrations at this past year's Winter Olympics in Sochi. We will provide insight not only on how our athletes fared in Sochi, but more importantly, how

the medical clinic functioned at Sochi. We will also provide insight into "The Team Behind the Team" at the Winter Olympics and Paralympics. Discussion will involve what went well, what could have been better, and what we learned moving forward to the next set of Olympics.

**Lecture: The USOC's National Medical Network and How ASD Members Are Becoming Part of This**  
**Speaker: Cory Warner, MHA, MPT**

Team USA is comprised of thousands of elite athletes who are spread across the U.S. To deliver best of class health care to Team USA, the United States Olympic Committee has developed a USOC National Medical Network, which includes members of the Academy for Sports Dentistry, physical therapy, and chiropractic. In addition, other opportunities may be opening up where team dentists may play a vital role in becoming involved with and assisting Team USA at some of our Olympic venues. At the conclusion of this presentation, participants will know how they can help Team USA through the USOC National Medical Network.

12:00 pm – 1:00 pm

**Lunch on your own**

1:00 pm – 1:45 pm

**Lecture: Recent Research on Concussion Prevention and the Effect of Clenching with Properly Fitted Mouthguards**  
**Speaker: Tomotaka Takeda, DDS**

This presentation will describe an effect of properly fitted mouthguards on not only dental related injuries but also concussions. Namely, it will focus on the importance of proper occlusion and clenching. Sports mouthguards help protect the teeth against injury. However, they do not necessarily prevent dental injury on all occasions. Levels of protection of mouthguards are different among types and qualities – custom made or boil and bite offer different protection capacity. Occlusion significantly influences level of protection. This presentation will cover results of both laboratory and on field studies. As a main topic of concussion prevention effect, recent research in rugby play will be explained. From a sports dentistry viewpoint or hypothesis, increased mastication muscle activity or voluntary clenching due to the presence of a mouthguard may enhance cervical muscle activity and thereby reduce the damage following impact. Measurements were performed during rugby contact practice involving head acceleration and masseter and sternocleidomastoid muscles activities. After the rugby players were instructed to clench their masseter muscles, marked decreases in head acceleration were observed. Mechanisms of mouthguards on concussion reduction or prevention will be reviewed as well. Further, this presentation will touch on an ongoing soccer heading study. At the conclusion of the presentation, participants will understand the importance of and effect of clenching with proper mouthguards on both dental related injuries and concussion prevention.

1:45 pm – 2:00 pm

**Break**

2:00 pm – 3:30 pm

**Advanced Suture Workshop: "Lips & Layers"**  
**Speaker: Chester F. Griffiths, MD, FACS**

Suturing techniques and materials are varied and unique to each application. Understanding the origin, materials and specific applications for each suture material will be discussed. It is the objective of this presentation to inform participants of the history of sutures to help them choose materials and enhance their practice.

3:30 pm – 3:45 pm

**Closing Remarks and Dismissal**

7:00 pm

**San Diego Padres Ballgame** – We may have tickets available for the San Diego Padres versus the Los Angeles Dodgers game. Once we have more information, it will be sent via email.

# Presenters . . .

## Elizabeth Broad

Liz Broad has been a sports dietitian for over 20 years in Australia, Scotland and now the USA. Liz is currently the Senior Sports Dietitian, Paralympic Programs, at the US Olympic Committee. She has worked with a wide range of sports and levels of athlete from junior development through Olympic and Paralympic summer and winter sports.

## John C. Comisi, DDS, MAGD

Dr. Comisi has been in private practice in Ithaca, New York, since 1983. He is the Chief Dental Officer at Vigilant Biosciences, Inc., and President and CEO of Dental Care with a Difference<sup>®</sup>, PC, where "Knowledge Brings Health." He is a graduate of Northwestern University Dental School and received his Bachelor of Science in biology at Fordham University. He is a respected key opinion leader and a member of the Catapult Group, the dental industry's premier speakers bureau. He is also an editorial board member for *Dental Product Shopper*, a member

of the editorial advisory board of *Dental Products Report*, and sits on the continuing education advisory board of Dental Learning. Dr. Comisi is a Master of the Academy of General Dentistry and holds Fellowships in the Academy of Dentistry International, the American College of Dentistry, the Pierre Fauchard Academy and the International College of Dentistry. He is also the Academy of General Dentistry's Speaker of the House.

## Brett Dorney, BDS, FASD

Dr. Brett Dorney graduated from Sydney University Australia in 1971 and obtained his fellowship from the Royal Australian College of Dental Surgeons in 1985. He has been awarded fellowships from the Academy for Sports Dentistry and the International College of Dentists. Dr. Dorney has been presenting in Australia and overseas for the past 20 years on the prevention and treatment of traumatic dental injuries.

He has been a member of the Academy for Sports Dentistry since 1995 and was president in 2006. A career highlight was being Deputy Director of Dental Services for the Sydney 2000 Olympic and Paralympic games. At present he is a clinical lecturer with Sydney University, being involved in graduate and undergraduate teaching.

## Chester Griffiths, MD, FACS

Dr. Chester F. Griffiths entered the private practice of otolaryngology, head and neck, cosmetic and reconstructive surgery with his father, Cadvan Owen Griffiths Jr., MD, a plastic and reconstructive surgeon in Brentwood, California, in 1989. He completed a three-year general surgery residency and a three-year residency in otolaryngology, head and neck surgery at the prestigious Thomas Jefferson University Hospital and Mercy Catholic Medical Center in Philadelphia, where he served as a chief resident in his final year. He completed a visiting

fellowship in plastic and reconstructive surgery in Rio de Janeiro, Brazil, with world-renowned plastic surgeon Dr. Ivo Pitanguy. Dr. Griffiths finished medical school at 21 years of age and was fully licensed to practice medicine at age 22. Dr. Griffiths is fluent in both Spanish and Portuguese. Dr. Griffiths has been active on the medical staffs of St. John's Medical Center and UCLA Medical Center, Santa Monica. Dr. Griffiths is double board certified by the American Board of Otolaryngology, Head and Neck Surgery and the American Board of Facial Plastic and Reconstructive Surgery. Since entering private practice, Dr. Griffiths has volunteered at the Venice Family Clinic, treating the uninsured as a consultant and performing surgical procedures pro bono. He feels compassionate about offering access to medical care for the indigent and working poor. In recognition of his service, Dr. Griffiths received the Morton K. Rubenstein Award for Outstanding Volunteer Physician in 1995. He is currently on the Board of Directors of the Venice Family Clinic, striving to continue healthcare access for the uninsured. Dr. Griffiths also served as the Chairman of the Department of Surgery at UCLA Medical Center, Santa Monica for 10 years, stepping down in 2008, and Vice Chief of Staff for three years. Dr. Griffiths is an Assistant Clinical Professor at UCLA School of Medicine, actively participating in teaching family practice residents. He received the Thomas L. Stern Award for Excellence in Residency Teaching. Dr. Griffiths has been elected by his peers to many leadership positions, including Treasurer of Saint John's Hospital Medical Staff, Vice President of the Los Angeles County Medical Association Bay District, and the Executive Medical Board of UCLA Medical Center, Santa Monica. He is a member of numerous societies and is a Fellow of the American Academy of Otolaryngology and the American College of Surgeons. He participates in annual medical lecture series and is retained by many attorneys, medical malpractice liability carriers and pharmaceutical companies to serve as an expert in his field related to medical quality of care issues.

## Jerry W. Hizon, MD

For over 25 years, Dr. Jerry Hizon has been a team physician for local high schools. He is the Immediate Past President of the Riverside County Medical Association and has been selected to be on the Board of Governors for the brand new Temecula Valley Hospital. Dr. Hizon is currently a member of the American Academy of Family Physicians, the American College of Sports Medicine, the NFL Team Physician Society, and the California Medical Association, and is one of the team doctors for the National Football League San Diego Chargers.

## Jeffrey Hoy, DDS, FASD

Dr. Jeffrey Hoy graduated from the University of Southern California School of Dentistry and has been treating dental trauma and sports-related dental injuries for over 30 years. Dr. Hoy is an active member of the Academy of Osseointegration, the Academy of Dental Sleep Medicine, the Academy for Sports Dentistry, and the International Association of Dental Traumatology. Dr. Hoy is a member of the National Hockey League Team Dentists Association and currently serves on the Board of Directors of the Academy for

Sports Dentistry as Secretary. In addition to serving as team dentist for the National Basketball Association Los Angeles Lakers and the Women's National Basketball Association Los Angeles Sparks, he is the dental consultant for the Harvard Westlake High School Department of Sports Medicine. Dr. Hoy maintains a full-time private practice in Torrance, California.

## Matthew Jacobsen, DMD, MD

Dr. Jacobsen grew up in southeastern Massachusetts in the town of Marion. He attended Bowdoin College, where he played football and graduated cum laude with a degree in Biology and minor in Chemistry. Dr. Jacobsen started his dental experience at the University of Connecticut in 1999 and graduated in 2003 with several honors and distinctions in oral and maxillofacial surgery, including the American Association of Oral and Maxillofacial Surgeons Award, the Dr. Richard G. Topazian Award in Oral and

Maxillofacial Surgery, and the American College of Dentists Award. Following his graduation from UCONN, he was accepted into the combined Harvard University/Massachusetts General Hospital Oral and Maxillofacial Surgery program. He completed his internship in oral and maxillofacial surgery at the Massachusetts General Hospital in 2003. Dr. Jacobsen graduated from Harvard Medical School in 2006. He then completed two years of general surgery at Massachusetts General Hospital. Finally, he finished his oral and maxillofacial training in 2009, during which time he served as the Chief Resident of the Oral and Maxillofacial Surgery Division at Massachusetts General Hospital and Children's Hospital in Boston. Dr. Jacobsen practices a broad scope of oral and maxillofacial surgery, including dentoalveolar and implant surgery, with an additional emphasis on orthognathic, reconstructive, and TMJ surgery. He is a member of the American Dental Association and the American Association of Oral and Maxillofacial Surgeons. He is involved in the community, serving on the active medical staff at both Maine Medical Center and Mercy Hospital and on the Greater Portland Cleft Lip and Palate Team. He is a team OMFS for the local AHL Portland Pirates.

## Douglas L. Lambert, DDS, FACD, FASDA, FASD, ABAD

Douglas L. Lambert, DDS, FACD, FASDA, FASD, ABAD, graduated from the University of Minnesota Carlson School of Management in 1980 and the University of Minnesota School of Dentistry in 1984, where he received the Outstanding Senior Student Award and the Quintessence Award. He is a Fellow in the American College of Dentists, the Pierre Fauchard Academy, the Academy for Sports Dentistry, and the American Society for Dental Aesthetics, and a

Diplomat of the American Board of Aesthetic Dentistry. He has been recognized annually as one of the top dental educators by *Dentistry Today* for twelve consecutive years and has been honored as a top dentist by *Mpls.St.Paul Magazine* and *Minnesota Monthly* each year for the past eleven years. Dr. Lambert has held many societal positions in organized dentistry, including Past President of the Minneapolis District Dental Society, six years as a Trustee to the Minnesota Dental Association, and a delegate to the ADA. He has authored and co-authored several articles on cosmetic and aesthetic topics, has presented numerous lectures and hands-on seminars nationally and internationally for dental organizations, universities, and study clubs, and is part of the education team for the post-graduate course in esthetic dentistry at the University of Minnesota School of Dentistry and the Catapult Group. He also serves as an independent consultant and

clinical researcher for many dental manufacturers and as the Team Dentist for the Minnesota Lynx of the WNBA. Dr. Lambert is senior partner in an aesthetic-based practice in Edina, Minnesota, emphasizing cosmetic, comprehensive, and sports dentistry. In his spare time, he enjoys relaxing with his family at their cabin in Wisconsin and playing a little golf.

### Stephen Mills, DDS, FASD

Dr. Mills is originally from Peekskill, New York, and attended Westminster College in New Wilmington, Pennsylvania, where he received his B.S. in 1977. He then entered the State University of New York at Buffalo School of Dentistry and earned his DDS in 1981. After three years on active duty in the US Army, he worked to get his certificate in Pediatric Dentistry at the Department of Pediatric Dentistry of the University of Connecticut, which he completed in 1987. Upon completion of his specialty training, he moved to Maine

to enter into the private practice of pediatric dentistry. His commitment to sports dentistry began in 1991 as he followed the direction of his mentor and friend Dr. Cosmo Castaldi. He joined the Academy of Sports Dentistry and after years on the Board of Directors became President of this organization in 2001-2002. Currently he serves the Academy as the editor of its newsletter, which appears regularly in the internationally read journal *Dental Traumatology*. He is board certified in pediatric dentistry and is active in the Academy of Pediatric Dentistry, serving as a legislative advocate to the members of the US Congress. He is also the President of the Maine Society of Pediatric Dentistry.

### William Moreau, DC, DACBSP, CSCS

Dr. Bill Moreau, DC, DACBSP, CSCS, is a chiropractic physician and conservative evidence-based sports medicine clinician who started work with the USOC in 2009 after more than 25 years of private practice. He became the Managing Director of Sports Medicine for the USOC in February 2012. Prior to this promotion, Dr. Moreau worked at the USOC as the Director of Clinics. Dr. Moreau oversees the sports medicine activities of the USOC, including clinics, games and the USOC National Medical Network. Dr. Moreau served as the

Medical Director for Team USA at the London 2012 Olympic Games, where he managed the implementation of medical care to more than five hundred athletes as provided by more than 100 medical providers. Dr. Moreau founded Fortis Cura, Inc., a consulting company dedicated to advancing patient centered care through the utilization and development of evidence-based musculoskeletal care pathways. He has been featured in *Bloomberg Business Week*, *USA Today*, *Time*, NPR, NBC, *GE Healthcare News* and *Kaiser Health News* and as a speaker for the USA Department of Health and Human Services Consumer Health IT Summit. Dr. Moreau has successfully presented over 450 postgraduate presentations, with a primary focus on sports medicine, throughout the United States and internationally. He has over 30 years of clinical expertise in both general practice and sports medicine, including Olympic, professional, collegiate, high school and recreational athletes. Dr. Moreau is well published with a focus on athletic injuries, with an emphasis in the study of concussion in sport. He serves on the editorial review board of the *Journal of Chiropractic Medicine* and has served for many years with the American Chiropractic Board of Sports Physicians. Dr. Moreau and his wife Karen live in Black Forest, Colorado. They have two sons, a daughter-in-law and a yellow Labrador.

### Lee Patalowski, DMD

Dr. Lee Patalowski is a graduate of Temple University School of Dentistry. He currently practices general dentistry in Lancaster, Pennsylvania, where he maintains active staff privileges in the Department of Surgery, Dentistry Section at Lancaster General Hospital. He is a Diplomate of the American Board of Special Care Dentistry and the National Dental Board of Anesthesiology, a Master in the Academy of General Dentistry, a Fellow in the Academy of Dentistry for Persons with Disabilities, and a Master in the College of

Conscious Sedation. In addition to private practice, Dr. Patalowski is the Founder and Director of the Center for Sports Dentistry. Prior to returning to private practice, he was an Assistant Clinical Professor in the Department of Oral Maxillofacial Pathology, Medicine and Surgery at Temple University School of Dentistry and in the clinical faculty practice at the University of Pennsylvania School of Dental Medicine. Dr. Patalowski has extensive experience in sports dentistry and dental trauma as a former Chief of Dentistry in a hospital-based dental clinic and director of one of the busiest dental school emergency clinics in the country.

### Mark Roettger, DDS, FASD

Mark Roettger first received his Bachelor of Science degree in biology from the University of Minnesota in 1977. He then received his Doctor of Dental Surgery degree from the University of Minnesota in 1982. He currently serves on the dental staff of the University of Minnesota Hospital, and is the Director of the University of Minnesota Physicians Dental Clinic as well as the Director of the General Practice Residency program at the University of Minnesota Medical Center.

He is a member of the American Dental Association, the Minnesota Dental Association, the American Association of Dental Research, and the American Academy of Oral Medicine. He has lectured throughout the United States and Canada on topics including TMJ, dental trauma, sports dentistry, mouthguard fabrication, management of head and neck cancer patients, and dental management of medically complex patients. Dr. Roettger has been a member of the Academy for Sports Dentistry since 1983. He served as President of the Academy from 1998-1999. He is a Fellow in the Academy for Sports Dentistry (2000). In addition, he has served as Editor of the ASD Newsletter from 2000-2007. He has also served as editorial reviewer for *The Physician and Sportsmedicine*. Dr. Roettger has 30 years of sports dentistry experience and currently has a lecture series on sports dentistry with Dr. Steve Mills.

### Leslie Rye, DDS, FASD, FAGD, FICD

Dr. Rye has provided general dental care for over 30 years in Reston, Virginia. She is a Past President of the Academy for Sports Dentistry and has served on boards of several professional and community organizations. Dr. Rye has earned special professional recognitions as a Fellow in the Academy of General Dentistry, the Academy for Sports Dentistry and the International College of Dentists. She has been an educator in many oral medicine, pharmacology and sports dentistry programs. Dr. Rye has participated and chaired many

school and community health outreach programs, which includes volunteering as a provider in custom mouthguard programs for professional and organized youth sports.

### Paresh Shah, MS, DMD, Cert. Esthetic Dent.

Dr. Paresh Shah maintains a private practice in Winnipeg, Canada with a focus on implant, cosmetic and interdisciplinary care. He graduated from the University of Manitoba in 1991. Dr. Shah received a Masters in Physiology in 1987 (U of Manitoba) and has a Proficiency Certificate in Esthetic Dentistry from the University of Buffalo (SUNY) in 2007. He has served as a clinical mentor in the Post Grad Program for Esthetic Dentistry at the University of Minnesota

and a part-time instructor at the University of Manitoba Faculty of Dentistry. He has taken well over 1800 hours of advanced education in esthetics, materials, implants, occlusion and interdisciplinary care. He also serves as a consultant for numerous dental manufacturers in product development and evaluations and is a member of the Catapult Group speakers bureau. He is the co-director of a Seattle Study Club in Winnipeg, section editor for *Esthetics* with the *CARDP Journal* and *Spectrum Journal* and has fellowships in numerous organizations including the ICOI and AGD. He lectures internationally on esthetics, implants, interdisciplinary care and staging complex restorative cases in general practice.

### Mike Short

Mike Short is a Client Relations Manager for Xenith Helmet Company, working with the NFL and colleges. Prior to his work with Xenith, Mike was the Director of Equipment for Florida Atlantic University from 2001-2011 and for the University of Miami from 1985-2011. He is a member of the Athletic Equipment Managers Association and has been certified since 1987. Mike has presented helmet fitting and safety seminars to AEMA, high school coaches associations and parents. He has also published three articles in

*Athletic Management* on equipment fitting and maintenance.

### Mike Stromsoe

After working in the restaurant and produce businesses, Mike Stromsoe joined his father's insurance agency in 1986. He started his own successful agency, which he and his wife still run today, along with two additional businesses. Among many things, it is Mike's core belief that one gets what one gives in this world. His passion is teaching and inspiring people who want to be taught and inspired.

# Register Early

Mike has created a proven, 3-step blueprint for growing your business, creating financial security and having more freedom, all based on his distinctive philosophy developed over 28 years of research. Mike's unique tools can be immediately implemented by any business team. Since Mike still owns and operates his own "Living Agency Laboratory," he continues to refine his philosophies and brings to market only the tools that work.

## Tomotaka Takeda, DDS

Dr. Tomotaka Takeda is an Assistant Professor in the Department of Sports Dentistry at the Tokyo Dental College in Tokyo, Japan. He is a graduate of Nihon University School of Dentistry and received his Doctor of Dental Surgery degree from the Graduate School of Nihon University. His initial major was in prosthodontics. In 1999, he first visited Dr. Brett Dorney in Sydney to learn sports dentistry. He moved to Tokyo Dental College after he returned to Japan. Currently,

he is ardently engaged in research, education, and treatment. He supports several rugby teams, plus many other athletes in karate, boxing, skating, and skiing. He hopes to prevent more dental-related injuries, including jaw fractures and concussions. He has frequently contributed to *Dental Traumatology* and has added greatly to the literature on sports dentistry. Dr. Takeda has been a member of the Academy for Sports Dentistry since 1999. He loves sports and sports dentistry.

## Gary Vitti

Gary Vitti has worked in the health care field for over 30 years, with the last 29 as the Head Athletic Trainer for the storied Los Angeles Lakers. During his tenure with the team, he has worked with such basketball greats as Kareem Abdul-Jabbar, Magic Johnson, James Worthy, Shaquille O'Neal and Kobe Bryant, to name a few. From 1984 to 1992, Vitti was also the Head Athletic Trainer for the Los Angeles Strings of World Team Tennis. His work with teams and exhibition

matches include but are not limited to tennis greats Jimmy Connors, John McEnroe, Bjorn Borg, Martina Navratilova, Billy Jean King and Chris Evert. In addition to his work experience, Vitti lectures internationally, has written a syndicated column, created an exercise video, published articles in peer reviewed journals, and appeared in two Hollywood movies. He has also been featured in *Sports Illustrated*, ESPN, Fox News Sports, *The Doctors*, *HOOP*, and Time Warner Cable Network, as well as several international publications. Along with his professional life, Vitti is known for his philanthropic work. He created the National Basketball Athletic Trainers Association Foundation. During his tenure as Chairman, the Foundation was involved with organ and tissue donation, the Miami Project for Paralysis, and the National Kidney Foundation, and provided countless scholarships for young athletic training students. Vitti created the National Athletic Trainers Association annual blood drive, which set records for convention blood drives for the American Red Cross. He also served on the board of A Window Between Worlds, an organization that uses art as a healing tool for survivors of domestic violence. He currently is on the advisory board of Team Heal, an organization that provides health care and education as well as scholarships in underserved communities, and he is also a strong supporter of the Boys and Girls Club. Vitti's work has been recognized and awarded by the 26<sup>th</sup> US Senate District, the 35<sup>th</sup> US Congressional District, the City of Los Angeles, the California Legislature, the US Naval Medical Center of San Diego, his alma mater Southern Connecticut State University, the Philippine Sports Commission, NBATA, Loyola Athletics, Team Heal, STR Basket Italia, and the Kappa Alpha Psi Fraternity.

## Cory Warner, MHA, MPT

Cory Warner, MHA, MPT, was selected as the Director of the National Medical Network for the United States Olympic Committee in June 2012. In this role, he has been instrumental in establishing national and regional medical partners to support Team USA athletes. Prior to this position, Cory has served in a variety of administrative and clinical roles including Service Line Director for Orthopedics, Neurosciences and Rehabilitation at Memorial Health System in Colorado

Springs, Colorado; Manager of Physical Therapy and Sports Medicine at the Nebraska Medical Center in Omaha, Nebraska; and Owner/Director of Mountain Land Physical Therapy and HPC in Billings, Montana. He has a master's degree in health care administration from Clarkson College in Omaha, Nebraska, as well as a master's degree in physical therapy from the University of Mary in Bismarck, North Dakota.

# Call for Abstracts – Poster Presentations . . .

All submissions to the Annual Symposium must be accompanied by an abstract using the format provided. Abstracts that do not follow these guidelines may be disqualified.

## 1.) General Guidelines

- Abstract must be submitted as an attached Microsoft Word document to email address: [sportsdentistry@consolidated.net](mailto:sportsdentistry@consolidated.net)
- Use 11 point Times New Roman font.
- Do not use bold, italic or underline unless otherwise indicated.

## 2.) Heading section (title, author, affiliation)

- This entire section should be bold.
- Use a clear, concise title that reflects the study/survey, etc.
- List the title capitalizing only the first letter of the title and ending with a period.
- List authors' names, last name first, followed by initials. Do not separate initials by periods or include authors' degrees.
- Separate authors' names by commas, with no period following final name.
- Place an asterisk after the presenter's name.
- List all affiliations following the last author's name and enclose them in parentheses. If there is more than one affiliation, separate them by semicolons.
- Include the city and state after each affiliation using uppercase postal abbreviations for state names (e.g., University of Michigan, Ann Arbor, MI).
- Do not place a period at the end of the Heading section

## 3.) Subhead section (if applicable)

Identify any supporting agency and grant number in 10 point italicized font, written as a complete sentence, and begin as follows: Research supported by...

## 4.) Body

The body cannot exceed 200 words and should follow the usual sequence of purpose, methods, results and conclusions. Abbreviations should be defined on first mention.

## Poster Presentations

Posters should be designed to fit a 4' (120cm) high by 6' (180cm) wide poster board. The poster session will last about one hour and presenters must be available for the entire viewing time.

**Deadline for submissions: April 15, 2014**
